Program Description:

The Business Administration Transfer associate in science degree program is designed to prepare students for transfer to bachelor's degree programs in Business. This option gives students a valuable foundation in introductory business, accounting and management coursework, as well as a broad general education core curriculum. Academic advisors and transfer counselors work closely with students to plan course selections in accordance with their intended bachelor's degree major and transfer institution.

Career and Transfer Outlook:

Most students in this program continue their studies toward a bachelor's degree in Business on either a full- or part-time basis. The transfer degree provides a solid foundation for students planning to continue on to study accounting, management, marketing, finance or management information systems. Students should check the requirements of the transfer institution and meet with career and academic/transfer counselors at MCC for specific program planning.

For those students who do not plan to transfer immediately to a bachelor's degree program, the Business Administration Transfer associate degree provides students with the necessary business skills to be successful in today's workforce. Students may pursue various careers in business in a wide variety of industries.

Helpful Hints:

Students should begin their math requirements early in their coursework and continue taking math courses until all of the mathematics requirements are fulfilled.

Special Requirements: This program contains many corequisites; see specific course descriptions for further clarification. Additional coursework may be required based on college placement testing. MA 1101, MA 1103 and MA 1104 will not satisfy any requirements in this program. Students are urged to meet with their advisor for proper course sequencing.
