			61-64	

**If math, must be MAT 100 or above

Special Requirements for Liberal Arts and Sciences: A two-semester history sequence (HST courses) is required for graduation. Enrollment in Freshman Seminar (one credit) is required for students in this program. *Must be from one of the following: MAT 120, MAT 177, MAT 180, MAT 185, MAT 189, MAT 190, MAT 250, MAT 270, MAT 271, MAT 290, MAT 291. Additional coursework may be required based on college placement testing. MAT 060, MAT 065, MAT 070, MAT 075, MAT 077 and MAT 080 will not satisfy any requirement in this program. Students are urged to meet with their academic advisor for proper course sequencing.

Eight credits of science are required for graduation. Students can meet the 8-credit requirement by either taking two 4-credit laboratory courses, or one 4-credit and two 3-credit non-lab sciences. Consult your transfer institution for their science requirements.

Program Description:

The Liberal Arts and Sciences Associate in Arts degree program is the academic base for many fields of study and work, providing the general education preparation for transfer to a bachelor's degree program. The Liberal Arts and Sciences program satisfies the Commonwealth Transfer Compact, which guarantees credit transfer to Massachusetts state colleges and the University of Massachusetts.

Career and Transfer Outlook:

Most students in the Liberal Arts and Sciences program continue their studies toward a bachelor's degree. Students should check the requirements of the transfer institution and meet with career and academic/transfer counselors at MCC for specific program planning. Students may pursue various careers in humanities, social sciences, mathematics, sciences or teaching professions.

Helpful Hints:

Students should begin their Middlesex experience by taking the foundation-level courses (English and mathematics) prior to, or along with, their electives. Writing and mathematics are fundamental to every subsequent course that students experience in the Liberal Arts and Sciences program.

It is also recommended that students sample courses from a variety of discipline areas each semester, rather than focusing on the areas they are most interested in at the beginning of their studies and leaving the courses they find less interesting until the end of their program coursework.
