**You've FINISHED!****Milestone Courses**

should be taken in the order shown. This will help you stay on track and graduate on time.

**Make Your Summer Matter.**

Summer is a great time to take some elective courses and get ahead.

**Helpful Hints**

- Students must begin the Calculus sequence in semester I.
- MAT 290 – Calculus I must be taken concurrently with, or prior to, PHY 171.
- MAT 291 – Calculus II must be taken concurrently with, or prior to, PHY 172.
- Students begin taking courses at UML during their third semester (reverse-transfer).
- Individual electives vary by engineering concentration. MCC students will take their engineering electives at UML, and receive full credit toward their associate degree through the reverse articulation agreement that is part of this program.
- Students who wish to transfer to four-year institutions other than UML upon completion of their associate degree should consult with Advising early in the program.

\*\* Humanities Electives: ART 101, 105, 106; COM 103; PHL 101; ENG 113, 119, 160, 161, 185

**Career and Transfer Outlook**

Career opportunities are open to students who transfer and complete a bachelor's degree. Engineers design complex systems, solve technical problems, and provide supervision and leadership.
