## You've FINISHED!

### Milestone Courses

should be taken in the order shown. This will help you stay on track and graduate on time.

### Career and Transfer Outlook

There is growing need for trained digital forensics professionals in federal, state and local agencies, law-enforcement organizations, and in the private sector. Crimes involving the use of computers have increased dramatically, and digital evidence is a potential part of most criminal investigations, creating a need for qualified, trained digital forensics personnel. The Digital Forensics Associate Degree is intended to augment the skills of professionals in both computer technology and criminal justice careers. This degree, along with an existing degree or professional experience in computer science or criminal justice, helps prepare students for jobs such as digital forensics analyst, digital forensics examiner and digital forensics specialist. This degree also helps prepare students for the Certified Computer Examiner exams.
