

## Preparation for College Math (Math Ramp-Up) Enrollment Information

Course	Who Should Enroll?
MAT 001	<ul style="list-style-type: none"> <li>• <b><u>ALL</u></b> first time students in the Ramp-Up Program, no matter which module they start in</li> <li>• Students who did not pass MAT 001 on their previous attempt of the course (Earned F or W)</li> </ul>
MAT 002	<ul style="list-style-type: none"> <li>• Only students who have successfully completed MAT 001</li> <li>• Students who did not pass MAT 002 on their previous attempt of the course (Earned F or W)</li> </ul>
MAT 003	<ul style="list-style-type: none"> <li>• Only students who have successfully completed MAT 002</li> <li>• Students who did not pass MAT 003 on their previous attempt of the course (Earned F or W)</li> </ul>
MAT 004	<ul style="list-style-type: none"> <li>• Only students who have successfully completed MAT 003</li> <li>• Students who did not pass MAT 004 on their previous attempt of the course (Earned F or W)</li> </ul>

\*These developmental courses are no longer being offered: MAT 080, MAT 100. The topics for these courses are now in Preparation for College Math, Modules 80 through 85.

### ***What Students NEED to know:***

- **All students must be present on the first day of lab/class in order to participate in this program; students who miss the first day of lab/class, but are present on the second day, will be accepted into the course on a conditional basis. Students who miss the first 2 days of class/lab will be dropped from the course.**
- There will be **no Adds or Late Admits** to this program.
- It is strongly recommended by the Math Department that students enroll in Preparation for College Math in consecutive semesters, in order to complete their modules.

## Preparation for College Math (Math Ramp-Up) Enrollment Information

Using the DegreeWorks audit (Remember: press **Process New** when you open the audit!):

In the Placement Scores field in DegreeWorks you may see multiple courses listed for MAT. If a course is listed, it means the student is eligible to take that course. Course choice depends on the math requirements for their degree program.

<b>Placement Scores</b>	ENG - 101	This student is eligible for all these courses. Course choice depends on their program requirements.
	ENGB - 099	
	MAT - 100	
	MATA - 001	
	MATB - 120	
	MATD - 177	
	RD - 078	
	RU81 - 999	
	RU04 - 999	
	RU08 - 999	
RU81-999 indicates the student has tested beyond Module 81. The student can start at Module 82		

The student in the example shown is eligible for:

- MAT 100, Intermediate Algebra (This class will be offered for the last time in Fall 2016 with very limited sections)
- MAT 120, Math for Liberal Arts
- MAT 177, Statistics
- MAT 001, Preparation for College Math, (The student would start in Module 82)

RU scores indicate that the student has finished that module or tested out of that module.

- 999 RU scores means they placed beyond that module by the placement test.
  - In the example above, the highest Module the student placed beyond is Module 81 (RU81-999). The student will start with Module 82.
- A score of 73-100 indicates that they earned the grade for that module in the course.

If you have any questions or need assistance in advising your students this semester, please contact Mike Williamson x3128 (Lowell) or Joanna DeMonaco x 3781 (Bedford) of the Math Department.
