## Monthly Highlight – Performance Recognition Program (PRP) Biotechnology Faculty

Join us in celebrating the awarding of our Biotechnology Faculty for the PRP Citation Award, a testament to their impactful role in our community. The department has created a supportive environment, fostering a sense of belonging for students, including those from distant locations like Fall River, MA, who are attracted to the biotechnology courses at the Lowell campus. The faculty's dedication is evident as three former students have returned as adjunct instructors, and two alumni actively contribute to the biotechnology program advisory board. The transformative Learn-and-Earn experience in biotechnology provides employment opportunities, exemplified by a student with a biology bachelor's degree who secured a full-time job after completing the biotechnology associate's degree at Middlesex. The industry, in turn, benefits from well-trained graduates.
