

# Security in Blackboard Collaborate

<p><b>Don't allow Guest Access:</b> you will not have a Guest Link. Only students enrolled in your class will be able to access the session.</p>	
<p><b>If you use Guest Access:</b> be prudent in sharing meeting links. Do not post links in social media or publish them on websites.</p>	
<p><b>Restrict participant privileges:</b> so they can not control their whiteboard, video/audio, and chat features (will diminish engagement in the class though).</p>	
<p><b>Enable 'Moderators Supervise All Private Chats':</b> so there are no direct messages between members of the session that could violate acceptable classroom conduct.</p>	
<p><b>Or Enable 'Participants can only chat privately with Moderators':</b> meaning no public chat.</p>	
<p>Default Attendee Role: Ensure that this is set at <b>'Participant'</b> (if use Guest Link)</p>	
<p>From ATTENDEES icon: check participants to use their <b>full legal name</b>, eliminate anyone who is not on your roster.</p>	
<p>From ATTENDEES icon: Mute or Remove Participants.</p>	

Hosts, Moderators and Instructors are reminded to adhere to all relevant privacy regulations and where meetings are recorded, notify participants to that effect prior to the start of the Meeting.
