SAFE RETURN TO CAMPUS PLAN

As of September 8, 2021 – Please Note: This document is a work-in-progress and is subject to updates as soon as updated state and federal guidelines are communicated to us.
Committee Members

Caitlin Buckley, Staff Writer, Marketing Communications

Brian Butler, Director of Facilities Management

Shannon Carroll, Administrative Assistant, Office of Student Engagement, AFSCME Union Steward (Unit I)

Patrick Cook, Executive Director of Public Affairs, Chair

Colleen Cox, Chief Administrative Officer

Joanna DelMonaco, Professor of Mathematics, MCCC Chapter President

Lauren Ellis, Program Manager of Community Education and Training

Christopher Fiori, Director of Data Analytics

Pamela Flaherty, MCC’s Associate Vice President for Student Affairs & Dean of Students

Jill Keller, Professor of English & Department Chair

Frank Kilroy, Adjunct Faculty, Business Department

Daniel Martin, Director of Public Safety and Transportation

Mark Matook, Coordinator of Library Systems and eResources

Frank Morande, Bedford Assistant Facilities Director

Rebecca Newell, Associate Dean of Students

Reginald Nichols, Assistant Director of HR Talent & Compliance/AAO/ADA/504/Deputy Title IX Coordinator

Peyton Paxson, Professor of BLPS and Humanities

Karen Townsend, Director of Dental Hygiene Education

Aleksandra Tugbiyele, Staff Assistant, Office of the President

Lisa Tuzzolo, Director of Corporate Education

Carolyn Walsh, MSN, RN Director of Nurse Education

Introduction

For our return to campus, constituents of the Middlesex Community College community created this “Safe Return to Campus” Plan. This plan strives to keep Middlesex students, faculty, staff, and community members safe when they are visiting our Bedford and Lowell campuses.

Understanding that information and protocols surrounding the COVID-19 pandemic are subject to constant changes, Middlesex will continually update this document using guidelines from the State of Massachusetts Department of Public Health (DPH) and the Centers for Disease Control and Prevention (CDC), among other reputable sources. This document may change without notice based on the recommendations and requirements of federal, state, and local governments, the CDC, DPH, and other college constituents, including the college’s Emergency Management Team, and MCC faculty and staff. As each area of the college will have their own specific needs, we understand that this document cannot be all encompassing and is not finite in its content.

On Tuesday, September 7, Middlesex resumed full on-campus operations to welcome back students to the campuses. This document details MCC’s general plan for a safe return to campus for all students, faculty, staff, and community members. With this plan as a foundation, individual departments may have additional needs or information that can be worked out with assistance from Human Resources.

MCC will offer six modalities of teaching for the Fall 2021 semester to offer students flexible course formats that best fit their schedule. Teaching modalities are specially assigned to each course depending on what works best for student learning and safety.

- **Online and On-Campus Lecture** – These hybrid (blended) classes combine on-campus and online instruction.

- **Online and On-Campus Lab** – These hybrid (blended) classes combine online instruction and on-campus labs.
● **Lecture** – This is a traditional on-campus face-to-face course. Classes meet weekly on campus with students and instructors.

● **Lecture and Lab** – This is a traditional on-campus face-to-face course and lab. Classes meet weekly on campus with students and instructors.

● **Online with Class Meeting Times** – This is a fully online class format with scheduled meeting days and times. Students must be online during scheduled meeting times.

● **Online with No Class Meeting Times** – This is a fully online class format. There are no scheduled meeting days or times. Lectures, lessons, and exercises are completed online over the course of the semester.

In order to ensure a safe and welcoming environment, MCC’s return to campus requires cooperation from all community members.
Preparing For A New Campus Environment

In order to comply with the Massachusetts Mandatory Workplace Safety Standards for reopening workplaces, employees will need to review the following material before returning to either Middlesex campus. These standards are designed to reduce the risk of COVID-19 transmission to employees and students, and are applicable to all sectors and industries.

In order to maintain hygiene safety and physical distancing best practices, Middlesex Community College will adhere to the standards set by the Commonwealth and other reputable sources, as summarized below.

Precautions Being Practiced

Behavioral Signage & Markings

Signage will be posted in conspicuous places and will include reminders such as – but not limited to – sign-in and sign-out, wear a mask, wash your hands, self-check for symptoms, and stay home if you are sick.

Hygiene Protocols

In order to prevent the spread of COVID-19 in our community, proper hand hygiene and use of appropriate personal protective equipment (PPE), including face masks or coverings indoors, will be essential. Hand sanitizing stations will also be available throughout the campus. At this time, face masks/coverings must be worn indoors in all public spaces (including hallways, common areas, stairwells, etc.). This will also include work areas and classrooms.

- Additional hand sanitizing stations have been added throughout campus in areas deemed appropriate.
- “Self-service” cleaning stations are set up throughout campus. Open-top trash receptacles will be available to discard cleaning materials and used PPE.
- Where applicable, each employee should have their own keyboard, mouse, and desk phone that are not shared; or wipe with disinfectant to clean after each shared use.
Shared items, such as department coffee makers, microwaves, water coolers, etc. are to be used at the employee’s own risk. It is recommended that only non-perishable food items are brought to campus. If shared refrigerators must be used, ensure items are kept separated from others’ items. Only disposable plates, utensils, etc. should be used and disposed of promptly.

**Handwashing**
- Hands should be washed frequently for a minimum of 20 seconds with soap and water.
- Hands should be dried with a paper towel, to be thrown away after use.
- If soap and water are not available, an alcohol-based hand sanitizer containing at least 60 percent alcohol can be used. Hand sanitizer will be available at various locations throughout the campuses for use.

**Face Masks/Coverings**
All visitors to either campus, including faculty, staff, and students, must be wearing masks the entire time they are on campus indoors and in class. Masks are required even for those who have received a vaccine.

**Putting on a face mask/covering:**
- Wash your hands thoroughly or use an alcohol-based hand sanitizer prior to touching your face mask/covering.
- A face mask/covering should completely cover from the bridge of your nose down and around the bottom of your chin. Your nostrils and mouth should be completely covered.
- Adjust the face mask as necessary to your face and press the metal strip to fit snugly against your nose (if applicable).
- Either tie the straps behind your head or place the ear loops around your ears.
• You should avoid touching the front or inner part of the mask while putting it on, or while wearing it.

Removing a face mask/covering:

• When removing the mask, avoid touching the front or inner part of the mask.
• Remove the face mask/covering by touching only the ear loops or straps.
• Disposable masks should be discarded immediately; reusable masks should be laundered after each use.
• Wash your hands or use an alcohol-based sanitizer after removing the face mask/covering.

Acceptable types of facial coverings include:

• Single-use disposable medical mask.
• Personal cloth mask that can be laundered after each use and is able to stay secured on the face without holding it in place. The CDC recommends at least two layers of tightly woven cotton fabric.
• Face shield worn in conjunction with a mask that extends down past the chin and wraps around the side of the face.

Wearing a face shield in conjunction with a face mask:

• If an employee chooses to wear a face shield, it must be worn in conjunction with a face mask.
• When putting on or removing a face shield, perform hand hygiene first.
• Avoid touching the front of the face shield when putting the face shield on.
● The face shield should extend down past the chin and wrap around the sides of the face. The face shield’s head piece should be in contact with the forehead without any gaps.

● Face shields should regularly be cleaned with warm, soapy water.

● After cleaning and drying the face shield with a clean paper towel, it may be wiped with 70 percent isopropyl alcohol to disinfect.

● It is not recommended to use household cleaners on a plastic face shield as this may cause damage to the plastic.

Accommodations

Some employees and students may need accommodations due to a need for modified protective gear. This may include, but is not limited to:

● Non-latex gloves, clear masks for lip-reading ability, gowns for wheelchairs, etc.

● Public Safety, Food Service, faculty teaching accommodated students, and others may be asked to wear lip-reading masks/face shields.

Accommodations requests shall be submitted to:

Students: Disability Support Services at disabilityservices@middlesex.mass.edu

Employees: Human Resources at nicholsr@middlesex.mass.edu

Personal Protective Equipment (PPE) Procedure

All Employees & Students

All employees and students must wear a face mask or covering indoors in common areas.

● Each department should reach out to Public Safety to address their specific PPE needs.

● Appropriate PPE must always be worn.
o Facial masks/coverings are required while indoors in common areas on campus, including for fully vaccinated individuals. If needed, disposable masks can be picked up at Public Safety on either campus, free of charge.

o Gloves may be required for certain services including, but not limited to, Campus Police, mail delivery, customer service counters, cash handling, food handling, and in the classroom. According to the CDC, gloves are not necessary for general use and are not a replacement for good hand hygiene.

o MCC does not allow the use of neck gaiters or bandanas as face coverings.

Refusal to Wear PPE
To address the refusal to wear PPE from an employee or student who has not requested or does not seek an accommodation:

- In the case of an immediate concern, such as but not limited to a classroom, lab, or other indoor space, Public Safety should be contacted followed by the appropriate contact for students or employees.

Students: Community Standards at communitystandards@middlesex.mass.edu

Employees: Human Resources at nicholsr@middlesex.mass.edu

These policies apply to all students, faculty, staff, and visitors. It is our collective responsibility to remind our community of these expectations. If you see someone not observing protocol, please remind them at once to do so. Then, if possible, remove yourself from any situation that is unsafe or not in compliance. If a student defies the request to comply, Public Safety should be contacted. Should the behavior persist, even with immediate remedy, the details of said behavior along with the student’s name should be submitted by Small Incident Form to the Dean of Students.

Students found in violation of the current policy will be reported to the Office of Community Standards and subject to potential sanctions up to and including removal from campus. Please review the disciplinary procedure and the MCC Code of Conduct in its entirety.
about how to best engage with students who are not in compliance is available by contacting the Student Assessment and Intervention Team at SAIT@middlesex.mass.edu.

Supervisors are responsible for making sure their employees are following the policies and procedures herein. Employees found in violation must be reported to Human Resources.

Visitors and vendors found in violation of the current policy will be asked to leave by Public Safety.

MCC’s capacity for monitoring these policies is limited to our mutual oversight. While the college hopes never to have to use a disciplinary process for related offenses, it is available if appropriate. In the majority of cases, reminders of the rules and assistance with compliance should suffice.
Classroom & Learning

In accordance with CDC guidance, it is required that Middlesex Community College students, faculty and staff who are sick with COVID-19, or who have recently had a close contact with a person with a confirmed case of COVID-19, shall not return to campus. However, the requirement to stay home may impact a student’s class participation, which often has implications for their course grades. Faculty are responsible for outlining attendance expectations in their syllabi and students are responsible for communicating attendance issues with their instructors with as much notice as possible.

The Safe Return to Campus Plan requires a daily self-evaluation of symptoms prior to arriving on campus. Individuals should not assume or diagnose any visible symptomatic behavior of others.

- Please actively encourage students to stay at home if they feel sick or have any of the symptoms of COVID-19. During this hiatus, please reconsider attendance policies so they do not appear to incentivize sick students coming to campus.

- Students who need to miss a class, or series of classes, due to illness or the need to quarantine/isolate are responsible for emailing their course instructor as soon as possible.

- Students are responsible for understanding their individual instructors’ policies and expectations regarding attendance and completing any work that they might miss due to illness or the need to quarantine/isolate, including assignments, quizzes, tests and exams.

- If a student or employee is concerned about their safety in any circumstance (including based on someone’s refusal to wear a mask or due to symptomatic behavior), they can remove themselves from the situation and contact Public Safety. (Note: Faculty who choose to leave class should dismiss class prior to departure.)
Space Activities

Laboratory/Clinical, Humanities Faculty & Students Returning

Labs and clinics have reopened to students to complete coursework (Nursing, Dental Hygiene, Dental Assisting, Biotechnology, Chemistry, etc.). Additionally, theater, art, and music programs have restored partial programming and will adhere to campus guidelines in place.

- Each lab/clinic has created a plan that addresses their specific areas and requirements.
- Classroom attendance will be taken daily and retained for contact tracing purposes.
- MCC has an adequate supply of PPE and disinfecting supplies for each classroom and student needs.
- Plexiglass and dividers have been installed in labs and clinics.
- Reasonable accommodations will be made for students who have requested one through Disability Support Services.
- All students will need to be trained for proper PPE use prior to starting. Please review training videos and protocol in this document for further details.
- Protocols are in place, including cleaning, PPE wearing, and other health and safety guidelines.

Clinical/Lab faculty and students will need to wear appropriate PPE relative to the specific program. This will vary based on circumstances and may include, but is not limited to, a combination of the following:

- Face mask, gloves, face shield, gown, shoe coverings, and hair coverings.
- Each department will work with the Emergency Management Team to order and supply PPE for in-lab/clinic use.
Service-Learning & Internships

Students participating in Service-Learning and/or Internships will need to wear appropriate PPE relative to the specific site in which they are working. This will vary based on circumstances, and students are expected to follow protocols at their specific site.

Middlesex Athletics and Special Events

Middlesex Community College will be suspending all intercollegiate and intramural sports, club leagues, and recreation for the 2021-2022 Academic Year. On and off-campus MCC sponsored events and programs will be considered on an individual basis and may be gradually re-introduced if all health and safety measures have been adopted and approved.
Facilities & Cleaning

We will continue to provide enhanced cleaning measures to our students and staff. Common areas and restrooms are being sanitized more frequently, and sanitization products will be available upon request.

Cleaning Procedures

Middlesex has secured sufficient cleaning products, supplies, and equipment. We are prepared to disinfect all common surfaces throughout campus at regular, frequent intervals.

- Frequent sanitization will be conducted of high-touch areas throughout the campuses (e.g. light switches, door handles, phones, railings, restrooms, public copiers, etc.).

- Our disinfectant is EPA-approved for COVID-19 effectiveness. It is also certified as non-hazardous and environmentally-friendly.

- Disinfectants and/or cleaning wipes have been provided to each department and classroom.

- Numerous hand sanitizer dispensers are installed and stocked throughout the campus.

- Classrooms are sanitized daily after all classes are done for the day – all desks, chairs, podiums, etc. Disinfection supplies are available in each classroom for use as needed.

- The instructor is encouraged to assist in disinfecting and cleaning the classroom at the end of each class.

- Touchless paper towel and hand soap dispensers have been installed. All hand dryers have been deactivated. Facilities will maintain a frequent schedule of sanitizing restrooms.

- In the cafeteria, hand sanitizer stations are provided, and all surfaces are frequently disinfected.
● Shared reading material and pamphlets have been removed from public areas.

**Elevators, Hallways, Etc.**

For traveling in building hallways, please follow directional arrows for traffic flow. For elevator usage, please adhere to guidelines posted at elevator access points.

**Open Spaces**

Restoration plans will be gradually introduced and meet with gathering capacity protocols for spaces and resources, including but not limited to:

● Vending Machines

● Lounges

● Shuttles

● Fitness Center

● Centers (Multicultural, Veterans Resource, etc.)

● Cafeterias

● Bookstores

● Lobbies

**Disinfecting Buildings After a Positive Diagnosis**

If an employee or student that comes to campus is diagnosed with COVID-19, targeted cleaning and disinfecting will be performed.

● When MCC is notified of a positive case, affected areas, rooms, and buildings must be vacated in order to implement cleaning and disinfecting protocols for affected areas.
● Building areas will be temporarily shut down until cleaning is completed and the area is approved as acceptable to reopen.

● Faculty, staff and students will be updated about classroom and building changes as necessary.

**Air Quality**

In response to inquiries about air quality in MCC properties, the college conducted an inventory and analysis of current systems. [Click here to read MCC’s air quality document provided by service vendor NV5.](#)
Frequent Communication

Middlesex Community College is committed to providing timely updates to our students, faculty, staff, and the community through our regular communication channels and new virtual methods. College-wide communication will be coordinated through the Marketing & Communications department. These communications will include, but are not limited to, periodic updates from the President and Emergency Management Team, postings on MCC’s COVID-19 webpage, as well as physical signage installed at both MCC locations. The President and Emergency Management Team may provide regular updates via email, virtual meetings, and video messages.

- Students and employees should continue to regularly check their MCC email, the Middlesex website, MyMCC portal, and the college’s social media pages, in addition to other communication venues.

- The MCC mobile app and MCCAlert text messages will be used when appropriate.

- MCC’s Return to Campus resource webpage will continue to be updated.

- Programs and services with social media accounts are encouraged to share MCC’s announcements with their followers.
Training

Students and employees are encouraged to watch the COVID-19 training videos listed below prior to returning to campus. The training videos are intended to protect the health and safety of the MCC community. Materials also align with the recommendations made by the Governor.

Help Prevent COVID-19 with Social Distancing

Stop the Spread of Germs like Seasonal Flu and COVID-19

How to Safely Cover Your Face Outside of Home
Check-in Procedures

Building Access

MCC properties will continue observing single points of access, but those entrances will be unlocked during identified hours of operation, and Public Safety will not need to be notified.

Moving forward through the remainder of the summer and heading into the fall semester, Middlesex Community College will continue using our mobile app to help us safely check students, staff, and faculty into our properties. You can download the app using either of these two routes:

Scan the QR code on the left or click the link below.
Download the MCC Mobile App for Apple users.

Scan the QR code on the left or click the link below.
Download the MCC Mobile App for Google Play users.

Using the QR (Quick Response) codes installed on standing signs in each of our lobbies, the utilization of the app helps provide a daily, safe, touchless manner for anyone to check in AND out of our properties. This will help our Facilities department continue to conduct targeted cleaning measures, as well as to help us locate individuals in the event of any COVID-19 cases that are reported to us moving forward.

Using your smart phone or device, open the MCC App, press the square icon in the upper left corner, and using your device's camera, take a picture of the QR code. It will log you into and out of buildings electronically with no need to sign in or out on paper!
Mental Health Resources

In order to support MCC students' academic success, a licensed mental health counselor is available to meet with students for mental health assessment, and, if needed, refer to treatment providers and resources in the local community, as well as to other support services within the College. These services are short-term, confidential, and are offered to enrolled students at no charge. Click here to read more about MCC’s Mental Health resources available for students.

Employee Assistance Program (EAP)

Human Resources realizes that this is a stressful time for our employees. All benefited employees have access to the Mass4You Employee Assistance Program (EAP) benefit. Mass4You offers several resources which may be particularly helpful during this stressful time, including counseling, financial, and educational resources. You can contact Mass4You 24/7 at 1-844-263-1982 or by visiting their website. They have also developed helpful online resources specifically geared toward stress caused by the Coronavirus pandemic.

There are also many support services available throughout our community. Information is available at Greater Lowell Health Alliance. All employees can view available support services at their local city or town website as well.

The Commonwealth has more information on maintaining emotional health and well-being.
MCC Operating Procedure

Communicable Diseases

A communicable disease is one spread from person to person through direct or indirect contact. Massachusetts law requires medical clinicians, laboratories, local boards of health, etc. to inform public health officials of newly confirmed cases of serious communicable diseases. Click here to read the full list of communicable diseases that must be reported by medical professionals to the Massachusetts Depart of Public Health and the reporting procedure.

Because MCC does not employ any medical professionals in a diagnostic capacity on site, the college is typically notified of a student or employee’s diagnosis of a communicable disease from the student or employee, a family member of the student or employee, and/or the DPH. Click here to view more specific information on MCC’s Communicable Disease Protocol.

Communicable Disease Notification Protocol

Identification of Student:

1. Self-Reported to either a doctor/medical facility; or the College or
2. Department of Public Health.

Identification of Employee:

1. Self-Reported to either a doctor/medical facility; or the College or
2. Department of Public Health.

Department of Public Health Contact at MCC:

Patrick Cook

Executive Director of Public Affairs
Work: 978-656-3134

Cell: 781-760-4450

Email: cookp@middlesex.mass.edu

Notification to a College Office:

If Human Resources, the Dean of Students Office, or any other MCC office receives notification of COVID-19 exposure of a student, employee, or community member visiting our campus from the Department of Public Health OR the individual, the email should be forwarded to the Emergency Management Team at emergencymanagement@middlesex.mass.edu.

The employee should reply to the person sending the e-mail notifying them who the College’s contact person is and their contact information. The employee shall also put the following statement in the email: “All further communication regarding this matter should go through the contact listed above.” The employee shall copy the contact person on the e-mail.

Interview of Reporting Party:

The person reporting the COVID-19 exposure may be asked to provide the following information:

- Name of individuals exposed
- Contact information including phone, email, and emergency contact
- Class schedule, including campus locations
- Work schedule, including campus locations
- Co-curricular activities, including campus locations
• Any other campus contact

• Meeting schedule of employee

• Date and time of diagnosis, symptoms, treatment, and clearance to return to school or work

Definitions

Communicable Disease

An infectious disease that is spread from person to person or from animal to person. The spread or transfer can happen through the air, through contact with contaminated surfaces, or through direct contact with blood, feces, or other bodily fluids.

Communicable Period

The time, usually measured in days, between exposure to an illness and the onset of symptoms.

Quarantine

Restriction of movements and/or action of individuals who are known to have been exposed to or may reasonably be suspected to have been exposed to a communicable disease and who do not yet show signs or symptoms of the infection.

Isolation

Restriction of movement and/or action of individuals infected with a communicable disease to reduce the chance of spreading disease. A decision to allow or restrict any campus or classroom activity for students/staff/faculty will include, but is not limited to, the following considerations:
1. The nature of the risk, or how the disease is transmitted

2. The duration of the risk, or how long is the carrier infectious

3. CDC and or the DPH recommendation for prevention

4. The severity of the risk, or what is the potential harm for third parties

5. The probability that the disease will be transmitted and will cause varying degrees of harm to surrounding students, faculty and staff's academic and employment community
Isolation & Quarantine Guidelines

Per protocols provided by the Centers for Disease Control and Prevention, Middlesex Community College has adopted the following guidelines to monitor campus ISOLATION and QUARANTINE COVID-19 cases:

Isolation or Quarantine: What's the difference?

Quarantine keeps someone who might have been exposed to the virus away from others. Isolation keeps someone who is infected with the virus away from others, even in their home.

Isolation is used to separate people infected with SARS-CoV-2, the virus that causes COVID-19, from people who are not infected. People who are in isolation should stay home until it’s safe for them to be around others. In the home, anyone sick or infected should separate themselves from others by staying in a specific “sick room” or area and using a separate bathroom (if available).

I think or know I had COVID-19, and I had symptoms – what now?

You can be with others after

- At least 10 days since symptoms first appeared and
- At least 24 hours with no fever without taking fever-reducing medication and
- Other symptoms of COVID-19 are improving
  - **Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation

If you had severe illness from COVID-19 (you were admitted to a hospital and needed oxygen), your healthcare provider may recommend that you stay in isolation for longer than 10 days after your symptoms first appeared (possibly up to 20 days) and you may need to finish your period of isolation at home.
I tested positive for COVID-19 but had no symptoms – what now?

If you continue to have no symptoms, you can be with others after:

- 10 days have passed since the date you had your positive test
- If you develop symptoms after testing positive, follow the guidance above for “I think or know I had COVID, and I had symptoms.”

Quarantine is used to keep someone who might have been exposed to COVID-19 away from others. Quarantine helps prevent spread of disease that can occur before a person knows they are sick or if they are infected with the virus without feeling symptoms. People in quarantine should stay home, separate themselves from others, monitor their health, and follow directions from their state or local health department.

What counts as close contact?

- You were within 6 feet of someone who has COVID-19 for a total of 15 minutes or more
- You provided care at home to someone who is sick with COVID-19
- You had direct physical contact with the person (hugged or kissed them)
- You shared eating or drinking utensils
- They sneezed, coughed, or somehow got respiratory droplets on you

**Scenario 1**

I think or know I had COVID-19 and I had symptoms – when can I be around others:

- It is important to stay home and away from others.
- Please watch the CDC video for more explanations for different situations.

**Scenario 2**

I think or know I had COVID-19 and I had no symptoms – when can I be around others:

- Please watch the CDC video for more explanation for different situations.
Health Protocols

Vaccinations

At this time, Middlesex Community College is not mandating vaccinations for students, staff or faculty. However, moving forward the college will potentially begin tracking vaccinations for students using current vaccination management programs. Those confidential records will be maintained by Enrollment Services.

All Massachusetts residents ages 12+ are eligible to access appointments.

At Middlesex Community College, we strongly urge our students, employees and the rest of our college community to receive a COVID-19 vaccine as soon as they are able. Top health officials for the state and the country, the CDC, and our community leaders have all demonstrated that the available vaccines are not only safe but are the most effective way to limit the spread of the coronavirus. The vaccines currently being administered have met the Food and Drug Administration’s rigorous scientific standards for safety, effectiveness, and manufacturing quality needed to support emergency use authorization. Millions of people in the U.S. have already received COVID-19 vaccines, and these vaccines will continue to undergo the most intensive safety monitoring in U.S. history.

Self-Monitoring Responsibility

Employees and students shall self-monitor their health status daily prior to reporting to work at either MCC location. Those who are feeling ill must not come to campus and should follow the appropriate sick notification procedure, as well as speak with their supervisor/instructor about completing work remotely, if possible. Additionally, employees and students experiencing COVID-19 symptoms should contact their doctor or local urgent care center for further guidance and testing procedures, as necessary.

According to CDC guidance, potential COVID-19 symptoms include, but may not be limited to:

- Fever or chills
• New cough (not related to a chronic condition)

• Shortness of breath or difficulty breathing

• Fatigue

• Muscle aches or weakness

• Sore throat

• New nasal congestion or runny nose (not related to seasonal allergies)

• New loss of smell or taste

• Nausea or vomiting

• Diarrhea

Please review the CDC’s Symptoms of Coronavirus for more information.

Self-Certification

Each time before coming to campus, every employee and student shall self-certify that they are healthy in order to enter either of MCC’s locations. Self-certifying includes asking themselves the questions included on the checklists below:

COVID-19 Daily Checklist

Self-Certification Questions:

• Do you have a fever (temperature over 100.3 degrees F) without having taken any fever-reducing medications?

• Are you experiencing loss of smell or taste?

• Are you experiencing muscle aches?

• Do you have a sore throat?
● Do you have a cough?

● Are you experiencing shortness of breath?

● Are you experiencing chills?

● Do you have a headache?

● Have you experienced any gastrointestinal symptoms such as nausea/vomiting, diarrhea, or loss of appetite?

● Have you, or anyone you have been in close contact with, been diagnosed with COVID-19 or been placed on quarantine for possible contact with COVID-19?

● Have you been asked to self-isolate or quarantine by a medical professional or a local public health official?

According to the CDC, a “close contact” is “someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period.” If you suspect you are a close contact or have otherwise been exposed to someone with COVID-19 or are experiencing symptoms of the virus, please consider contacting the Emergency Management Team at EmergencyManagement@middlesex.mass.edu.

If any employee answers ‘yes’ to any of the questions above, they should stay home and do the following:

● Contact their supervisor per normal sick notification procedures

● Be encouraged to contact their doctor or urgent care center

● Continue to work remotely if able

● Be allowed to use one’s leave time

● If they are not able to use paid time off or would like to discuss other paid leave options, they should contact Human Resources.
• Should an employee report to work sick and another employee is concerned, they should contact their immediate supervisor. The supervisor may reference training guidelines and recognize the need for employees to stay home and take care when they are sick. Supervisors can contact Human Resources for additional information on coaching and training resources as needed for compliance with the guidelines.

If any student answers ‘yes’ to any of the questions above, they should stay home and do the following:

• Contact MCC’s Emergency Management Team

• Be encouraged to contact their doctor or urgent care center

• Contact their instructor to let them know they will not be attending class

• Should a student report to class sick and someone is concerned, they should contact the Emergency Management Team at EmergencyManagement@middlesex.mass.edu.

Protocol for Positive COVID-19 Cases at MCC

• The local BOH or DPH will contact MCC’s Emergency Management Team if there are any confirmed cases of COVID-19.

• Contact tracing for those diagnosed with COVID-19 will be completed should the BOH/DPH contact MCC and indicate they need assistance. Otherwise, all contact tracing will be conducted by the agency, which may go back 2 weeks prior to testing positive.

• The BOH will advise on the next steps regarding appropriate cleaning, closure of buildings, etc.

• The identity of a student or employee who has tested positive for COVID-19 will not be shared with anyone outside of the Emergency Management Team or Human Resources. Contact tracing will determine who needs to be notified if they are determined to be a close contact.
Travel & Exposure Reporting

Domestic and travel abroad opportunities have been suspended at this time. So that the college may take appropriate preventative measures, offer available resources, and immediately assist any member of our community who may become ill or has been in close proximity with someone who has become ill, it is asked that employees consider sharing information with the college regarding possible exposure to the virus. The information voluntarily submitted will assist the college in implementing any precautions or protocols recommended by public health agencies. All information gathered through this process will be maintained confidentially only with MCC’s Emergency Management Team, will be separate from personnel files or student records, and shall be used only to assist the college in providing and maintaining a healthy learning and working environment.

Travel

If you are traveling, please review the updated Student & Employee Travel Protocols. Students, staff and faculty are urged to monitor current State Department travel regulations and CDC guidelines as potential outbreaks globally could impact timely return to our campuses. Please review the U.S. State Department travel advisories for the latest updates.

Exposure to COVID-19

Should you be informed that you are a close contact to someone who has tested positive for COVID-19, MCC follows CDC guidelines. An email should immediately be sent to EmergencyManagement@middlesex.mass.edu.

- Fully vaccinated people should be tested 3-5 days following the date of their exposure and wear a mask in public, indoor settings for 14 days or until they receive a negative test result. They should isolate if they test positive. Fully vaccinated people should monitor for symptoms of COVID-19 for 14 days following exposure.

- Unvaccinated people who have been in close contact with someone who has COVID-19 must quarantine. They should stay home for 14 days after their last contact with the person who has COVID-19 and watch for symptoms of COVID-19 themselves.
Please read a list of available testing sites. Some testing sites are free and do not require insurance. Please call ahead to confirm.

**High Risk Populations**

According to the CDC, age increases the risk of COVID-19 infections. Additionally, individuals of any age with certain conditions may have a higher risk for COVID-19 infection.

Individuals are considered at an increased risk if they have any of the following conditions which may include, but are not limited to:

- Cancer
- Chronic kidney disease
- COPD (chronic obstructive pulmonary disease)
- Immunocompromised state (weakened immune system) from solid organ transplant
- Obesity (body mass index, or BMI, of 30 or higher)
- Serious heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies
- Sickle cell disease
- Type 2 diabetes mellitus

Individuals might be at an increased risk if they have any of the following conditions which may include, but are not limited to:

- Asthma (moderate to severe)
- Cerebrovascular disease (affects blood vessels and blood supply to the brain)
- Cystic fibrosis
• Hypertension or high blood pressure

• Immunocompromised state (weakened immune system) from blood or bone marrow transplant, immune deficiencies, HIV, use of corticosteroids, or use of other immune weakening medicines

• Neurologic conditions, such as dementia

• Liver disease

• Pregnancy

• Pulmonary fibrosis (having damaged or scarred lung tissues)

• Smoking

• Thalassemia (a type of blood disorder)

• Type 1 diabetes mellitus

Please refer to CDC guidance for a complete list of those who might be at higher risk. Students who may fall into these categories may voluntarily reach out to Disability Support Services regarding accommodations for their return to on-campus learning. Employees who may fall into these categories may voluntarily reach out to Human Resources regarding accommodations for their return to the workplace.
Space & Staffing Protocols

Telework

While waiting until Massachusetts telework policies are further developed, staff and faculty have returned full-time as of September 7. Further updates regarding telework policies will be shared by Human Resources incorporated into this document moving forward.

Space Reconfiguration

Everyone, including employees, students, and vendors, must wear a face mask in common areas inside campus buildings. To aid in this, Middlesex has taken the following initiatives:

● Office Reconfiguration

   o Desks are spaced an appropriate distance apart. Plexiglass barriers have been installed in lobbies, waiting rooms, office welcome areas, and other locations as deemed necessary.

● All restrooms on campus, regardless of size, will adhere to occupancy limits delineated on signage on respective doors.

● Food Services

   o The Cafeterias will not be reopening with full services at this time.

● Public Areas

   o In an effort to keep our campus as clean as possible, individuals should always ensure that they sanitize tables before and after use, and throw away their trash. A face mask should be worn indoors unless eating or drinking.
Employees Returning To Work On Campus

Public Safety keeps a daily log of who is on campus each day and requests access to buildings. Along with the daily logs, they keep the schedules of employees working on campus on a regular basis (e.g. Facilities, Enrollment, ITS, etc.).

- While on campus, employees should follow established precautions and wear a face mask/covering indoors, and practice frequent hand hygiene.

- The employee should stay in their workspace and not visit other areas, except for the nearest restroom or to get lunch. A face mask must be worn indoors in common areas at all times on campus if the employee is not in their private office, alone with the door closed. Employees may eat in their office, alone, with the door closed.

- Childcare needs/plans will be taken into consideration.
  - Dependent on schools’ reopening plans (full-time, hybrid or remote).
  - Dependent on daycare availability.

- Mail is continuing to be delivered, in a limited capacity, on a regular basis during the week.

Staffing Protocol

Access to the grounds by the public is permitted, but wearing face masks/coverings indoors in common areas is a standard practice.

If outbreaks reemerge in the MCC service area or among the campus populations, it may become necessary to further reduce staffing, and protocols will then be reassessed.
Potential Outbreak

Surge Response

Preparation for Possible Increased Waves of Infections

1. A sufficient inventory of PPE, hand sanitizer, and cleaning supplies will be kept on hand and ordered regularly.

2. Policies, protocols, and procedures will continue to be reviewed and updated as necessary.

3. Closing procedures will be in place should the pandemic return at a level deemed necessary for closure by state guidance.

4. MCC will remain focused on being prepared for technology needs of staff and students if remote work is reinstated.

Middlesex is dedicated to the safety and well-being of our students, faculty, and staff, and will be diligent in following the guidelines and protocols set forth in this guide as a model for the protection from COVID-19 and other infections.
