MULTIPLE MEASURES
English 101

- US HS GPA of 2.7 or higher (10 years)
- Verbal SAT score of 500 or higher (3 years)
- ACT English score of 22 or higher (3 years)
- HiSet score of 15 or higher (3 years)
- GED score of 165 or higher (3 years)
- College transcript (College level English Comp class)
College Level Math

- US HS GPA of 2.7 or higher (3 years)
- SAT Math score of 600 or higher (3 years) = MAT 290
- ACT Math score of 22 or higher (3 years)
- MAT 290 (2.7 GPA + Trig. & Precal grade of B or better)
- MAT 196 (2.7 GPA + Algebra II grade of B or better)
- College transcript (College level Math class)

Section 2: General Questions

1-4 • Background Questions

5-7 • Reading textbooks and novels
      • Writing essays

8 • Ability to speak in English and
     • be understood by other people
Section 3 – Reading Evaluation

The short reading below represents a typical text that you may be assigned to read and write about ENG 101 (English Composition I). Please do the short reading below and then answer a series of questions. This is not a test but will assist you in your final English course selection.

**Short Reading #1 Demanding More from College by Frank Bruni**

I’m beginning to think that college exists mainly so we can debate and deconstruct it.

What’s its rightful mission? How has it changed? Is it sufficiently accessible? Invariably worthwhile?

As the fall semester commenced, the questions resumed. Robert Reich, the country’s labor secretary during the Clinton administration, issued such a pointed, provocative critique of the expense and usefulness of a traditional liberal arts degree that Salon slapped this headline on it: “College is a ludicrous waste of money.”

Meanwhile, the sociologists Richard Arum and Josipa Roksa were out with a new book, “Aspiring Adults Adrift,” in which they assessed how a diverse group of nearly 1,000 recent graduates were faring two years after they finished their undergraduate studies. About one quarter of them were still living at home. And nearly three-quarters were still getting at least some money from parents. These were the nuggets that the media understandably grabbed hold of, drawing the lesson that college isn’t the springboard that young men and women want and perhaps need it to be.

I have a problem with all of this. But my concern isn’t about the arguments themselves or some of the conclusions drawn. It’s about the narrowness of the
Section 3: Reading Evaluation

Section 4 – Writing Evaluation

1. In the past three years, what types of writing have you done most?
   ___ Papers in English classes
   ___ Papers in other classes
   ___ E-Mails at work
   ___ Reports or memos at work
   ___ Online writing (social media posts, blogs, newsletters, other)
   ___ Poetry, stories, or songs
   ___ Other ___

2. In the past three years, how many papers or reports have you written that incorporate ideas and information from books, articles, or websites?

   ___ I have not done this in the last three years
   ___ One to three times
   ___ Four or more times
Next, please read the passage below and use it to write an essay in response to the question.

The reasons students choose to attend college have been steadily shifting over the course of the last half-century. Ira Harkavy and Matthew Hartley of the University of Pennsylvania write, “In 1900, barely 4 percent of all high school graduates attended college. By 1970, that number had grown more than tenfold (45 percent). The reasons for attending college began to shift. Economic purposes gained ascendancy. Data from an annual survey of more than 200,000 incoming freshman by the Higher Education Research Institute (HERI) at UCLA show that in 1969, 80 percent of incoming freshman believed that developing a meaningful philosophy of life was a very important goal; by 1996, that percentage diminished to 42 percent. In 1979, half of the students (49 percent) said they were attending college “to be able to make more money: by 1991, that figure had climbed to three-quarters (74.7 percent). Increasingly, the public came to view a college education as a ticket to securing a good job – a private rather than a good public good.”
Section 4: Writing Evaluation (Essay)

- **ENG 092**: Not very confident in comprehending, writing, correcting for grammar and have not written papers (3 years)
- **ENG 109/ENG 101**: Combination of confident and not very confident and you have written some papers (3 years)
- **ENG 101**: Confident and have written papers (3 years)

<td>3 credits</td>
</tr>
<tr>
<td><strong>Description</strong></td>
<td>Reading, Writing, and Reasoning</td>
<td>This course enhances students’ ability to read insightfully, and think critically about a variety of texts they may encounter in their academic and professional careers—ultimately creating “a habit of mind characterized by the comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating an opinion or conclusion” (AAC&amp;U). By registering for this course, the student will also be registered in a linked ENG 101 taught by the same instructor.</td>
<td>English Composition 1 (ENG101) focuses on developing students’ academic writing, close reading, and critical thinking skills.</td>
<td>English Composition 1 Honors: Choose ENG 101 Honors if you want to enhance your learning experience by concentrating on important skills for career and/or transfer: critical thinking, research, verbal presentation, and interpretive analysis. Honors courses provide a place for you to work with like-minded students working closely with instructors who help guide and prepare you for the job market and transfer to four-year colleges and universities.</td>

| MAT120 Math for Liberal Arts | Topics will be drawn from areas such as: collecting, describing and analyzing data; probability and decision-making; loans and investments; population growth; linear programming; and geometry of measurement. Course uses group work/projects and focuses on real-life applications of concepts. | 1. Change the following into a percentage. \( \frac{3}{14} \)  
2. Change the percentage to a fraction in lowest terms 74%  
3. Change the percentage to a decimal 52%  
4. Determine the value of the expression when \( x = 7 \) \( 3 \sqrt{(10 - x)^2} \)  
5. Solve for \( x \) \( 2(x - 7) = 5(x + 3) - x \)  
6. Solve \( 4 = (3 + 7) + 15 ÷ 5 - 2 \)  
7. \( \frac{7.8}{13} = \frac{n}{2.6} \) solve for \( n \) |

**Next Step**

- If you solved all the problems correctly and you feel comfortable with Math:
  - take the listed Math course

- If you solved most of the problems correctly but would benefit from some support:
  - take MAT 007 with MAT 120 or MAT 177
  - take MAT 008 with MAT 195

- If you did not solve all the problems correctly, or you do not feel comfortable with Math:
  - take MAT 001
  - review the problems for Modules 70/80 or Module 5
